

Dipesh Patel

Software Developer | Backend & API Development | AI Integration | [dipesh-patel-portfolio](#)
Ahmedabad, Gujarat, India | +91 8319821606 | dipesh.patel1902@gmail.com | [linkedin.com/dipesh-patel](#) | [github.com/starkdipesh](#)

PROFESSIONAL SUMMARY

Software Developer with 1+ year of experience building backend systems and REST APIs using Python and PHP/Laravel, including MySQL database design, MVC architecture, and workflow automation for enterprise ERP modules. Skilled in integrating APIs and third-party services into production applications. Actively developing skills in Machine Learning, NLP, and robotics simulation (ROS2, Unity) to move into AI-focused engineering roles. Comfortable across the stack: backend logic, database design, and frontend integration.

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, C++, C, SQL

Backend & APIs: Laravel, REST API design & integration, MVC Architecture, MySQL

Frontend: HTML5, CSS3, Bootstrap, jQuery, Blade

Tools & Practices: Git, GitHub, VS Code, Jupyter Notebook, Agile workflows, debugging & troubleshooting

Currently Building: Machine Learning & NLP fundamentals, ROS2, Unity 3D (robotics simulation)

PROFESSIONAL EXPERIENCE

Junior Backend Developer (PHP / Laravel)

Shree Mahakali Software Pvt. Ltd. — Ahmedabad | Jun 2025 – Present

- Designed and optimized MySQL databases for ERP modules, improving data pipeline reliability and query performance.
- Developed and integrated RESTful APIs and admin-managed modules supporting enterprise-level workflows.
- Built responsive, data-driven interfaces by integrating backend logic with Blade, Bootstrap, and JavaScript.
- Diagnosed and resolved production issues, performing bug fixes and system enhancements with minimal downtime.
- Automated internal data-handling processes, reducing manual effort and improving data accuracy across ERP modules.

PROJECTS

AI-Integrated Virtual Assistant (Python) — [github.com/starkdipesh/JIA-VIRTUAL-ASSISTANT](#)

- Built a hybrid automation assistant supporting dual-mode interaction (voice and silent text input) for hands-free and quiet-environment use cases.
- Implemented event-driven local system control and task automation logic in Python.
- Designed for accessibility across noisy, quiet, and hands-free-restricted environments where standard voice assistants fall short.

E-Procurement System (Live Enterprise Application)

- Engineered an automated procurement platform with dynamic multi-level approval routing and automated cost calculation.
- Implemented programmatic Purchase Order (PDF) generation, eliminating manual document errors.
- Replaced a paper-based workflow with a fully auditable, step-by-step digital process end-to-end.

EDUCATION

Bachelor of Computer Applications (BCA) — Sardar Patel University | 2022 – 2025 | CGPA: 8.44 / 10

LANGUAGES

English, Hindi, Gujarati
